# Deploy: angular-todo

Screenshots:

Todo

This project was generated with Angular CLI version 14.0.2.

Development server

Run `ng serve` for a dev server. Navigate to `http://localhost:4200/`. The app will automatically reload if you change any of the source files.

Code scaffolding

Run `ng generate component component-name` to generate a new component. You can also use `ng generate directive|pipe|service|class|guard|interface|enum|module`.

Build

Run `ng build` to build the project. The build artifacts will be stored in the `dist/` directory.

Further help

To get more help on the Angular CLI use `ng help`.
